

Newly installed terrazzo floor polished to a high gloss by the TPS Diamond System

# SUBSTRATE TECHNOLOGY, INC. POLISHED TERRAZZO FLOORS

The TPS Diamond System is designed specifically for epoxy terrazzo floors.

This high quality metal-bond and resin-bond diamond system preps and polishes new or existing terrazzo floors easily in seven simple steps.

Unlike coatings that wear off, the TPS system creates a true mechanical shine. In other words, there is absolutely NO need for a guard to add that "pop" to the final floor.

The TPS shine lasts for years and requires little maintenance to maintain the beauty of the floor.

And, to obtain even better results, be sure to use the STI Grout Pans for mechanically filling up to 95% of the pin holes before final polishing!

All tools on this page are built with the patent pending EG Quick Change System (Patent 8,192,255).

*Approximate life of the TPS metal-bonds is 12,000-30,000 SF.  
Approximate life of the TPS resin-bonds is between 15,000-20,000 SF  
depending on the #pad and condition of the floor.*

## STI Grout Pans – Fills up to 95% of Pin Holes!

### For Concrete and Terrazzo Floors

While most projects budget two-three days for grouting—with the STI Grout Pans, all you need is **two days to grout and cut** in order to get results that are impossible to achieve by conventional methods!

These patent-pending grout pans attach to your grinding machine and mechanically **fill up to 95% of pin holes** using marble flour and epoxy to increase the final shine.
