

7" SCORPION 2600VS GRINDER PACKAGE

The Scorpion 2600VS Variable Speed Grinder Package is built around a powerful 15 Amp, 7" hand-held variable speed grinder designed to prepare concrete surfaces for coatings while collecting dust when connected to a vacuum. The variable speed control lets contractors match the RPM to the task at hand; run higher speeds for aggressive coating removal and grinding down high spots, or dial it back for greater control when removing carpet glue, working near edges, or using speed-sensitive tooling.

Considered a must-have for any industrial flooring contractor, the Scorpion is ideal for smaller jobs or as the perfect complement to walk-behind grinders on larger projects. Its compact, hand-held design excels at grinding edges, tight areas, underneath fixtures, and anywhere a large floor grinder or shot blaster can't reach.

This Scorpion 2600VS comes equipped with a Scorpion Grinder (15 AMP) Grinder, U.S.SAWS Convertible Dust Shroud, Comfort Grip Loop Handle and Nuts.

Features:

- 15 Amp motor delivers the muscle needed for aggressive grinding and coating removal
- Variable speed control lets you adjust RPMs to match the task, from heavy material removal to delicate surface prep
- A vacuum-ready dust shroud connects directly to your vacuum for cleaner, dust-free grinding
- The lightweight, handheld design makes it easy to maneuver for smaller jobs or detail work on large projects
- Variable speed allows proper operation of cup wheels and polishing pads for versatile tooling compatibility
- The complete package includes the Scorpion grinder, dust shroud, loop handle, and nuts

7" VARIABLE SPEED SCORPION GRINDER

Part Number	SX60627
Grinder Make and Model	Scorpion 2600VS Grinder
Power Source	Electric
AMP	15
RPM	2700 - 6200 (no load speed)
Power Requirements	120V, 60Hz
Minimum CFM	175
Wheel Diameter	7"
Weight	20 lb
